एक विरासत की शुरुआत

मैं समस्त युवक व युवतियों को यह बताना चाहता हूँ कि हमें सदैव आशा रखनी चाहिये तथा कभी हिम्मत नहीं हारना चाहिये। आप सफलता केवल तभी प्राप्त कर सकते हैं जबकि आप इसके लिए अपना पसीना बहाएं तथा पूरी लगन व परिश्रम के साथ कार्य पर जुट जाएं। मैं दावे के साथ कह सकता हूँ कि भारतीयों का दिमाग किसी ट्यूटमिक, नॉर्डिक या अंग्रेज से किसी मायने में कम नहीं है। शायद हममें साहस व उस जीत की भावना की कमी है जो कि हमें सफलता दिला सकती है। हमें अपने आप में जीत की भावना को जगाना है, अपनी क्षमता को पहचानना है और लगन के साथ कार्य करना है तभी हम इस विश्व में अपनी सही जगह पर पहचाने जाएंगे।

अगर किसी भी प्रकार हम यह भावना पैदा कर लें तब हमें हमारा लक्ष्य मिलना सुनिश्चित है।

Dr. C.V. Raman University (Khandwa)

Dear Students, Parents and Guardians,

One of the critical decisions by any parent, guardian or student would be to choose the right college, institute, or university for furthering higher education, the decision in most cases depends on the scores secured in the senior secondary school, entrance examinations attempted, percentile and or ranks obtained and before the personal choice of the subject. What we do not considered in this decision making is future career goals of the students, seldom any student take a cognitive decision on the career options available and falls prey to rat race. 12 PRINCIPLES OF KNOWLEDGE MANAGEMENT

1. Knowledge is messy. Because knowledge is connected to everything else, you can't isolate the knowledge aspect of anything neatly. In the knowledge universe, you can't pay attention to just one factor.
2. Knowledge is self-organizing. The self that knowledge organizes around is organizational or group identity and purpose.
3. Knowledge seeks community. Knowledge wants to happen, just as life wants to happen. Both want to happen as community. Nothing illustrates this principle more than the Internet.
4. Knowledge travels via language. Without a language to describe our experience, we can't communicate what we know. Expanding organizational knowledge means that we must develop the languages we use to describe our work experience.
5. The more you try to pin knowledge down, the more it slips away. It's tempting to try to tie up knowledge as codified knowledge-documents, patents, libraries, databases, and so forth. But too much rigidity and formality regarding knowledge lead to the stultification of creativity.
6. Looser is probably better. Highly adaptable systems look sloppy. The survival rate of diverse, decentralized systems is higher. That means we can waste resources and energy trying to control knowledge too tightly.
7. There is no one solution. Knowledge is always changing. For the moment, the best approach to managing it is one that keeps things moving along while keeping options open.
8. Knowledge doesn't grow forever. Eventually, some knowledge is lost or dies, just as things in nature. Unlearning and letting go of old ways of thinking, even retiring whole blocks of knowledge, contribute to the vitality and evolution of knowledge.
9. No one is in charge. Knowledge is a social process. That means no one person can take responsibility for collective knowledge.
10. You can't impose rules and systems. If knowledge is truly self-organizing, the most important way to advance it is to remove the barriers to self-organization. In a supportive environment, knowledge will take care of itself.
11. There is no silver bullet. There is no single leverage point or best practice to advance knowledge. It must be supported at multiple levels and in a variety of ways.
12. How you define knowledge determines how you manage it. The "knowledge question" can present itself many ways. For example, concern about the ownership of knowledge leads to acquiring codified knowledge that is protected by copyrights and patents

Renewable energy park (Bhuvan Bhaskar Urja Kshetram)

Government of India is aiming towards a capacity of about 100,000 MW to come from Solar Energy by the year 2022. This includes a capacity of 40,000 MW to come up on the rooftops of various buildings and houses spread throughout the country. The Ministry of New and Renewable Energy sources is looking for training about 50,000 Suryamitra in next 3 years. Considering the huge technically trained manpower requirement to meet this ambitious goal, Skill Council for Green Jobs is targeting a special skilling course on Solar PV Installer with the name called Suryamitra. The reason why we are doing this is a Renewable energy park (Bhuvan Bhaskar Urja Kshetram). Lots of interest and attention is given to this field because of another possibility station oriented generation and transmissions is also possible like tidal power is mostly used in coastal area, wind power is used in hill stations, solar is used in villages with paddy fields and buildings with large area of rooftop. Being into different area it is obvious that energy extractions are not going to be same.
